

Project Scope

Scope definition for the Campus Event Hub — the business problem, objectives, stakeholders, requirements, MVP, and sprint plan.

Business Problem

Requirements

MVP

Sprint Plan

Product: Campus Event Hub

Type: Web & mobile platform for university campus events

Prepared by: Allulu Alkheraiji — Business Analyst

1. Business Problem

University students rely on scattered channels — printed posters, group chats, and individual department emails — to learn about campus events. This fragmentation creates real problems for everyone involved:

- Students **miss events** because there is no single place to discover what is happening on campus.
- Registration is handled through **manual sign-up sheets and messages**, giving organizers inaccurate attendance counts.
- Students **forget events** they intended to attend because there are no reminders.
- Event changes and cancellations are **communicated late or not at all**.
- Proof of participation (certificates) is produced **manually**, slowly, and inconsistently.
- Student-affairs teams have **little visibility** over attendance and engagement.

Problem statement: The university lacks a centralized, reliable platform for students to discover, register for, and attend campus events — resulting in low awareness, poor attendance, inaccurate records, and manual certificate handling.

2. Objectives

The Campus Event Hub aims to deliver the following measurable objectives:

#	Objective	Description
01	Centralize discovery	Provide one web and mobile platform where students can browse and search all campus events.
02	Enable self-service registration	Allow students to register and cancel online, giving organizers accurate, real-time attendance counts.
03	Reduce no-shows	Send automated reminders and event-change notifications to improve attendance rates.
04	Verify attendance	Capture attendance reliably via QR check-in with a manual fallback for organizers.
05	Automate certificates	Generate verifiable attendance certificates automatically, removing manual effort.
06	Restrict to the university	Ensure only verified university students can access the platform and its events.

3. Stakeholders

Stakeholder	Type	Interest / Responsibility
Students	Primary user	Discover, register for, attend events, and receive certificates.
Event Organizers / Club Leads	Primary user	Create and manage events, view rosters, and mark attendance.
Student Affairs / University Admin	Sponsor / Oversight	Oversee engagement, ensure policy compliance, and review participation.

Stakeholder	Type	Interest / Responsibility
Product Owner / Business Analyst	Delivery	Own the backlog, define requirements, and prioritize value.
Development Team	Delivery	Design, build, and maintain the web and mobile platform.
QA Team	Delivery	Validate features against acceptance criteria and report defects.
Email / Notification Service	External dependency	Deliver reminder and update notifications to students.

4. Functional Requirements

Functional requirements are organized by epic and traced directly to the product backlog (user-story IDs in parentheses).

Account & Profile

ID	Requirement	Trace	Priority
FR-01	The system shall allow a student to create an account using my university email.	US-01	High
FR-02	The system shall allow a student to log in securely and reset my password if I forget it.	US-02	High
FR-03	The system shall allow a student to view and update my profile details.	US-03	Medium
FR-04	The system shall allow a student to select my interests so events are personalized.	US-04	Low

Event Discovery & Registration

ID	Requirement	Trace	Priority
FR-05	The system shall allow a student to browse all upcoming campus events in one place.	US-05	High
FR-06	The system shall allow a student to search and filter events by keyword, category, and date.	US-06	High
FR-07	The system shall allow a student to register for an event with available capacity.	US-07	High
FR-08	The system shall allow a student to see my registered events and cancel if needed.	US-08	Medium

Notifications & Reminders

ID	Requirement	Trace	Priority
FR-09	The system shall allow a student to get a reminder before an event I registered for.	US-09	Medium
FR-10	The system shall allow a student to choose which notifications I receive and how.	US-10	Low
FR-11	The system shall allow a student to be notified when a registered event is changed or cancelled.	US-11	Medium
FR-12	The system shall allow a student to see all my notifications in one place.	US-12	Low

Attendance & Certificates

ID	Requirement	Trace	Priority
FR-13	The system shall allow a student to check in at an event by scanning a QR code.	US-13	High
FR-14	The system shall allow an event organizer to manually mark attendance for students.	US-14	Medium
FR-15	The system shall generate a certificate when a student attends an event.	US-15	High
FR-16	The system shall allow a student to download my attendance certificate as a PDF.	US-16	Medium

5. Non-Functional Requirements

ID	Category	Requirement
NFR-01	Performance	Event listing and search results load within 2 seconds for up to 1,000 concurrent students.
NFR-02	Security	Passwords are hashed; all traffic uses HTTPS; access is restricted to verified university accounts.
NFR-03	Availability	The platform targets 99.5% uptime during the academic term, excluding scheduled maintenance.
NFR-04	Usability	Core flows (discover, register, check-in) are completable in 3 steps or fewer on mobile.
NFR-05	Responsiveness	The interface adapts to mobile, tablet, and desktop without loss of functionality.
NFR-06	Scalability	The system handles peak loads during major campus events without degradation.
NFR-07	Reliability	Registration and certificate generation are idempotent — no duplicate records on retries.
NFR-08	Accessibility	The UI follows WCAG 2.1 AA contrast and keyboard-navigation guidelines.
NFR-09	Privacy	Student personal data is stored and processed in line with the university's data-protection policy.
NFR-10	Maintainability	The codebase is modular by component (Authentication, Events, Notifications, etc.) to ease updates.

6. Out of Scope

The following are explicitly excluded from this release to keep delivery focused:

- **Paid ticketing and online payments** — all events are free; no payment processing.
- **Public (non-university) access** — the platform serves verified university students only.
- **Native standalone apps** — delivery is a responsive web/mobile experience, not separate iOS/Android apps.
- **Integration with external LMS or HR systems.**
- **Social networking features** — chat, feeds, comments, and friend systems.
- **Advanced analytics / BI dashboards** beyond basic attendance records.
- **Multi-university / multi-campus tenancy** — a single university instance only.
- **Event content marketing / CMS** for external promotion.

7. Minimum Viable Product (MVP)

MVP definition: the smallest set of features that lets a verified student discover an event, register, check in, and receive a certificate — proving the core value end-to-end.

EPICS TOUCHED

1

SPRINT

MVP scope (delivered in Sprint 1):

ID	Story	Epic	Priority	Points
US-01	Sign up with university email	Account & Profile	High	5
US-02	Log in and reset password	Account & Profile	High	3
US-05	Browse campus events	Event Discovery & Registration	High	3
US-06	Search and filter events	Event Discovery & Registration	High	3
US-07	Register for an event	Event Discovery & Registration	High	5
US-08	View and cancel my registrations	Event Discovery & Registration	Medium	2
US-13	Check in at an event with QR code	Attendance & Certificates	High	5
US-15	Auto-generate attendance certificate	Attendance & Certificates	High	5

8. Sprint Plan

Delivery is planned across two 2-week sprints: an MVP foundation, then enhancements.

Sprint 1 — MVP Foundation · Release 1.0

Sprint Goal: Deliver the core end-to-end journey: sign in, discover events, register, check in, and receive a certificate.

ID	Story	Component	Priority	Points
US-01	Sign up with university email	Authentication	High	5
US-02	Log in and reset password	Authentication	High	3
US-05	Browse campus events	Events	High	3
US-06	Search and filter events	Search	High	3

ID	Story	Component	Priority	Points
US-07	Register for an event	Events	High	5
US-08	View and cancel my registrations	Events	Medium	2
US-13	Check in at an event with QR code	Events	High	5
US-15	Auto-generate attendance certificate	Certificates	High	5
			Total points	31

Sprint 2 — Enhancements · Release 1.1

Sprint Goal: Add profile personalization, notification preferences, announcements, manual attendance, and certificate access.

ID	Story	Component	Priority	Points
US-03	View and edit my profile	Profile	Medium	3
US-04	Manage interests for personalized events	Profile	Low	2
US-09	Receive event reminders	Notifications	Medium	3
US-10	Manage notification preferences	Notifications	Low	2
US-11	Receive event updates and cancellations	Notifications	Medium	3
US-12	In-app notification center	Notifications	Low	2
US-14	Organizer marks attendance manually	Events	Medium	3
US-16	Download my certificate	Certificates	Medium	2
			Total points	20
